HEALTH

WATCH

AN ALTERNATIVE WORLD HEALTH REPORT

4

The Global Health Watch (GHW) report is widely perceived as the definitive voice for an alternative discourse on health. The report integrates rigorous analysis, alternative proposals and stories of struggles and change to present a compelling case for imperatives to work for a radical transformation for the way that we approach actions and policies on health. It is designed to question present policies on health and to propose alternatives.

The report, GWH4 is a collaborative effort by activists and academics from across the world, and has been coordinated by the People's Health Movement, Health Action International, Third World Network, Medact and Asociacion Latino-americana de Medicina Social.
